

## PRESS RELEASE

21 February 2018 – FH012018

### A new Fern-Howard on show at Light + Building

Just how rapidly Fern-Howard continues to grow from a specialist UK bulkhead manufacturer into wider European markets can be seen at this year's Light+Building in Frankfurt. There's a completely new range of Fern-Howard LED lamps on show – featuring a CRI of 90 that shows colours at their truest.

#### *Always at the forefront of lighting technology*

But then Fern-Howard has always been at the forefront of lighting technology, and that now means lighting control. So, visitors will be able to test some of their smart control options - such as Tuneable White and Wireless Control via the Casambi app.

There is also the brand new Linear LED range that includes the weatherproof PremaLux batten available in several options and sizes, the ultra-efficient internal PremaLine batten and a continuous Link LED Batten system, PremaLink. PremaLink allows contractors to quickly create custom lighting for various applications simply by connecting different lengths battens via push-fit connectors. The system can span up to 20m from one power source and, at 145 Lumens per Watt, it's also highly energy efficient.

There are new LED bulkheads like the Drake, available in different styles, trims and sizes, stylish new bulkheads like the President, and the highly energy efficient upgraded Icebreaker range performing at 100 Lumens per Watt.

The ultra slim EdgeLED™ E1 ceiling panel, combining perfectly uniform light with Tuneable White, will also be on show alongside upgraded, highly energy efficient, Cutlass Ceiling Panels (100 lm/W).

All just as robust and reliable as ever, packed with contractor friendly features, and competitively priced, these new ranges are a sure sign of Fern-Howard's continued transition into a full range lighting manufacturer.

They can all be seen on stand C50 in Hall 4.1, where visitors can expect a warm welcome, and see just how much Fern-Howard is changing.

Ends

**Note to Editors**

Fern-Howard - a UK based manufacturer of energy efficient, high quality luminaires since 1987 – are now a 100% LED lighting product development business focused on reducing energy without compromising quality of light.

Our products are designed to deliver light where it is required – reducing wasted light and cutting light pollution.

Over 500,000 fittings are manufactured annually at Fern-Howard's state-of-the-art UK factory.
