

PRESS RELEASE

20 August 2018 – FH062018

Fern-Howard's new Fotini LED Downlighters – the perfect GU10 replacement.

Everybody loves a downlighter – you'll find GU10 downlights everywhere - but the technology is showing its age. That's why Fern-Howard have added yet another product to its ever-growing range – this time it's the Fotini Downlighter – an LED replacement for those ageing GU10 units.

But Fotini don't just replace downlighters, they improve downlighting too. Their wide, 120-degree beam gives uniform light distribution that eliminates spottiness or dark patches and with energy savings of up to 86% and a long life they are the ideal replacement for Halogen or Fluorescent.

There's an integrated LED driver for quick and easy installation, a choice of 3000K Warm White and 4000K Natural White and three sizes. The Fotini 3 fits 100mm (3") openings and the Fotini 4 120mm (4"), whilst the Fotini 6 has a large Ø105-150mm cut-out tolerance and a clip system that means it fits most pre-existing cut-outs. It can even cover damaged edges.

Easy to clean with a wipeable surface and ideal for a wide range of commercial and residential applications, Fotini means we can go on loving downlighters for a whole lot longer.

Ends

Note to Editors

Fern-Howard - a manufacturer of energy efficient, high quality luminaires since 1987 – are now a 100% LED lighting product development business focused on reducing energy without compromising quality of light.

Our products are designed to deliver light where it is required – reducing wasted light and cutting light pollution.
